

Critical Compute Services

Empowering your business with performance, control, and scalability across bare metal, private cloud, and multi-tenant cloud services.

Your business is only as nimble as your data

SMBs and large enterprises face a long checklist of critical compute challenges:

- Managing expanding data pools—and reducing them when necessary
- Moving data and operations into a full/hybrid cloud environment
- Managing cloud costs while scaling operations
- Leveraging big data analytics
- Complying with complicated (and evolving) compliance regulations
- Sourcing solutions that are easy to use, cost-effective, and supported by experts.

Tick every box on your data wish list with ThinkOn Critical Compute Services.

The hyperscalers are good at what they do—but can they provide the tailored solutions you need?

Tired of the same old problem? Time for a new solution!

It's the same old story.

The big three hyperscalers are all about the same solutions for the same business problems—and that can leave you feeling like Goldilocks—with compute offerings that are too complex, or too rigid, or too difficult to manage...they just don't fit... But we do!

We're like a fairy godmother for your data

You need data services that keep up with the fast-paced global landscape—secure, compliant, scalable, and efficient. Finding all that, plus a provider who genuinely understands your unique business needs —well, that feels about as unlikely as a fairy tale coming true.

From once upon a time...to happily ever after

Wishing on a star won't solve all your data problems, but ThinkOn Critical Compute Services will—with:

- **Enhanced Security:** Safeguard data with advanced security and access control.
- **Compliance Ready:** Simplify adherence to regulations like GDPR and CCPA.
- **Scalable Solutions:** Grow your IT infrastructure seamlessly as your business expands.
- **High Performance:** Reliable compute power for critical, bottleneck-free operations.
- **Transparent Pricing:** Competitive, flexible pricing for any budget.
- **Customizable & Agile:** Quickly adapt to market changes with tailored compute options.

Our solutions are user-friendly—and so are we!

When you choose ThinkOn Critical Compute Services you get 24/7/365 support from our team of expert Thinkers.

Multi-tenant cloud

Streamline application deployment with a dynamic, scalable environment that adapts to changing needs without sacrificing performance—all with cost-effective, reliable performance, and strong security measures.

Private Cloud

Effortlessly balance scalability and control, knowing that your infrastructure is both flexible and secure—and your sensitive data protected by advanced security measures tailored to regulatory requirements.

Bare Metal

Support critical legacy systems and high-performance workloads with robust, reliable, and compliant infrastructure, that meets performance and compliance needs—optimizing organizational efficiency and reliability.

Got a growing/shrinking problem?

Your evolving business needs room to grow. With ThinkOn CCS, you have the freedom to scale up—or down—with flexible, scalable solutions, and no restrictive lock-in.

Big Bad Wolf-proof

Your data. Your reputation. Your business. When it comes to protecting the things that matter most, choose ThinkOn—the only cloud that supports fully homomorphic encryption.

There's no place like ThinkOn

Flexible, scalable solutions that fit any budget—and with no ingress or egress fees and multiple pricing models, ThinkOn is your home for no-tears-no-fears billing.

Your data, your way

With ThinkOn Critical Compute Services, flexibility, scale, and simplicity come standard—across bare metal, multi-tenant, or private cloud.

Are you ready to think bigger? ThinkOn.

Visit us at www.thinkon.com, and learn how ThinkOn Critical Compute Services can help you write the next chapter for your data—no magic wands required!
