

Critical Compute Services

Empowering your business with performance, control, and scalability across Dedicated Bare Metal, Private Cloud and Multi-Tenant Cloud services.

Challenge

Running your business shouldn't mean wrestling with infrastructure. But growing data, rising costs, and evolving compliance make it tough to keep up. IT teams need to manage expanding data, move workloads into full or hybrid clouds, control costs while scaling, leverage big data, and stay audit-ready—all with solutions that are secure, easy to use, cost-effective, and supported by experts. Without the right fit, businesses risk slowdowns, overspending, and unnecessary security or regulatory headaches.

ThinkOn's Critical Compute Services are the essential foundation for your cloud and IT strategy.

Our flexible suite—Dedicated Bare Metal, Private, and Multi-Tenant—lets you run any workload securely and reliably while reducing operational complexity. Maintain compliance, scale on demand, and keep costs predictable, all with full visibility and control. Use these services and free your team from infrastructure firefighting to focus on strategic initiatives. Let's set up a call to discuss how we can round out your compute strategy.

By the numbers

50%

of business leaders reported that challenges with technology infrastructure are a barrier to success.

71%

of organizations say their network assets are mostly aging or obsolete.

94%

of C-suite executives believe that legacy infrastructure is hindering their business agility.

Results you can rely on

Scale confidently, protect your data, minimize downtime, and keep operations running smoothly—empowering your teams to focus on what matters most.

- Scalable infrastructure ensures critical workloads run smoothly, letting your teams focus on results—not firefighting.
- Protect your most valuable assets with advanced security and compliance features that give you peace of mind that data and operations are safe.
- Built-in compliance support reduces headaches, speeds audits, and keeps your business in good standing.
- Transparent subscriptions and no hidden fees free your budget for growth initiatives instead of surprise bills.
- Flexible compute scales with your business so your teams can innovate and expand without infrastructure constraints.

Features & capabilities

With ThinkOn Critical Compute Services, flexibility, scale, and simplicity come standard—across bare metal, multi-tenant, or private cloud.

Multi-tenant cloud

Streamline application deployment with a dynamic, scalable environment that adapts to changing needs without sacrificing performance—all with cost-effective, reliable performance, and strong security measures.

Private Cloud

Effortlessly balance scalability and control, knowing that your infrastructure is both flexible and secure—and your sensitive data protected by advanced security measures tailored to regulatory requirements.

Bare Metal

Support critical legacy systems and high-performance workloads with robust, reliable, and compliant infrastructure, that meets performance and compliance needs—optimizing organizational efficiency and reliability.

Enhanced security

Safeguard data with advanced security and access control.

Compliance ready

Simplify adherence to regulations like GDPR and CCPA.

Scalable solutions

Grow your IT infrastructure seamlessly as your business expands.

High performance

Reliable compute power for critical, bottleneck-free operations.

Transparent pricing

Competitive, flexible pricing and no hidden fees – ever.

Customizable & agile

Quickly adapt to market changes with tailored compute options.

Why choose ThinkOn?

- We're 100% channel-only, so we never compete with partners or sell direct—we win when you win.
- Our building block approach integrates modular tech stacks to help you scale, innovate faster, and stay competitive.
- ThinkOn is not subject to any foreign data access or privacy regulations outside of Canada.
- ThinkOn is a VMware Cloud Service Provider (VCSP). We are a VMware Sovereign Cloud Provider built on the VMware platform and the first Canadian partner in the VMware Sovereign Cloud Initiative.
- Predictable, subscription-based pricing means no hidden fees or billing surprises.
- Our 24/7/365 support is always human—no bots, no menus, just real help when you need it.
