

Disaster Recovery with Zerto

Minimize downtime and protect your business with fast, reliable disaster recovery.

Challenge

Unexpected outages, ransomware attacks, or human error can bring your operations to a standstill—threatening revenue, productivity, and customer trust. Many businesses underestimate how quickly downtime can escalate into lost opportunities and costly recovery efforts. Without a modern, reliable disaster recovery solution, teams scramble to restore systems, leaving critical data exposed and business continuity at risk.

DRaaS with Zerto delivers fast, secure disaster recovery to keep your business running no matter the scenario.

With near-instant application recovery, point-in-time restores, and seamless failback, your data is always protected. The result: minimized downtime, resilient systems, and protection for revenue, productivity, and customer trust. ThinkOn ensures your teams can focus on strategic priorities instead of crisis management.

By the numbers

69%

of organizations experienced an attack at least once in 2025.

94%

of organizations increased their recovery budget for 2025.

89%

of organizations had their backup repositories targeted in 2025.

Results you can rely on

Minimize downtime, safeguard data, and ensure uninterrupted operations—protecting revenue, productivity, and customer trust.

- Minimize downtime and disruption by getting systems back online fast so your business keeps moving.
- Protect critical data automatically—no lost files, no surprises, complete peace of mind.
- Maintain smooth operations with automated recovery and testing that lets your team focus on growth, not crisis management.
- Safeguard revenue, productivity, and trust so customers stay happy, your brand stays strong, and the business stays resilient.

Features & Capabilities

ThinkOn takes the hassle out of disaster recovery testing. With our Managed Zerto Disaster Recovery as an add-on, workloads are validated monthly, compliance reports are generated automatically, and your IT team regains valuable time. Monthly testing strengthens your DR posture, confirms RPO/RTO objectives, and ensures workloads will power on and remain recoverable. Reports provide audit-ready proof, while early detection of capacity gaps, misconfigurations, or replication issues prevents problems before a real disaster occurs.

Point-in-time recovery

Restore applications and data within minutes to keep operations running without interruption.

Journal-based tracking

Capture and track all data modifications efficiently, ensuring quick recovery and data accuracy.

Near-synchronous replication

Replicate workloads rapidly across multiple data centers for minimal downtime and reliable failover.

Managed DR testing

Monthly testing validates workloads, confirms RPO/RTO objectives, and delivers audit-ready compliance reports, catching gaps or misconfigurations before they impact operations.

Compliance and reporting

Automated reporting provides proof that DR plans are tested and ready, simplifying audits and maintaining regulatory confidence.

Why choose ThinkOn?

- We're 100% channel-only, so we never compete with partners or sell direct—we win when you win.
- Transparent, predictable pricing means no ingress, egress, or hidden fees—ever.
- Zerto-certified experts provide faster, more personalized support than relying on vendor channels.
- Modular, scalable DR solutions adapt to your business growth without costly infrastructure investment.
- Our 24/7/365 support is always human—no bots, no menus, just real help when you need it.
- ThinkOn is not subject to any foreign data access or privacy regulations outside of Canada.

"We partnered with ThinkOn for cloud services because their security is top-notch, their support is exceptional, and their pricing is on point. Compass—their partner portal—helps us stay nimble and agile, so we can meet clients' needs quickly."

—Glenn Kemp, Managing Director, Clear Concepts
