

Backup Services powered by Commvault Cloud

Easy, reliable data protection with ThinkOn's ultra-resilient infrastructure

Challenge

Keeping critical data protected shouldn't be complicated. With virtual machines, databases, and hybrid workloads to manage, IT teams face pressure to control costs and cut recovery times. But many backup tools only add complexity — creating more manual work and less peace of mind.

ThinkOn Backup Services, powered by Commvault Cloud, are the essential foundation to your data protection and business continuity plans.

We provide fast, secure, and automated backup for virtual machines, databases, and hybrid environments, specifically designed to reduce downtime, prevent data loss, and simplify recovery. Use our backup services individually or as part of a complete solution stack to effortlessly protect your critical data. Let's set up a call to discuss how we can round out your data protection strategies.

By the numbers

91%

of IT leaders admitted making trade-offs in their security strategy due to AI, cost-cutting, and system complexity.

98%

of IT leaders in the US., have implemented or plan to implement immutable storage within the next year.

75%

of SMBs don't have a business continuity plan.

Features & Capabilities

ThinkOn Backup Services powered by Commvault Cloud protects virtual machines, critical databases, and hybrid environments. Choose what fits: self-managed or fully supported backup services, with predictable costs and complete control through Commvault's easy-to-use Cloud Portal.

Virtual machines protection

Fast, secure backups for virtual machines with flexible recovery options.

Granular database backup

Agent-based backups for SQL, Oracle and more. Restore exactly what you need when you need it.

Multi-tiered storage

Combine local, offsite, and cloud storage to balance cost and performance.

Built in ransomware defense

Immutable backups and offsite copies keep data safe from cyber threats.

Cloud portal simplicity

One intuitive dashboard to manage backups and monitor usage.

Flexible backup options

Choose the level of support—self-managed or fully handled by ThinkOn.

Everything in one place

Simple management, powerful performance, and built-in compliance, all on a single platform with one invoice.

Why choose ThinkOn Backup Services?

A combination of trusted technology, straightforward pricing, and reliable performance—backed by expert support when it matters most. When you work with ThinkOn, you get:

- Centralized dashboard delivers real-time backup insights and easy control.
- Empowering faster deployments and reduced operational overhead
- Flash-based object store delivers fast, reliable data handling ensuring instant access to critical data when you need it most.
- Policy-driven automation frees you to focus on what matters.
- 24/7 expert MSP support keeps your environment secure and optimized.
- Easy-to-use managed backup that grows with your infrastructure.
- Partner-first mindset driving mutual growth and stronger collaboration.
- Transparent pricing, no hidden fees, ever. Giving you cost certainty and the confidence to scale without surprises.

Results you can rely on

Experience dependable backup and recovery designed to keep your data safe and your business running smoothly.

- Spend less time managing backups and more time on strategic projects.
- Speed up recovery times and minimize downtime when incidences happen.
- Optimize storage costs with flexible multi-tier options.
- Gain peace of mind meeting security and compliance needs with built in ransomware protection.

Protect your data without the drama. ThinkOn Backup Services powered by Commvault Cloud keeps your backups reliable, flexible, and hassle-free — so you can focus on what really matters.

Ready to think bigger? ThinkOn.

“ThinkOn’s high level of security and reliability, the ease of doing business with them, the monthly billing, and the unlimited data combine to create a phenomenal product.”

—Tony Smith,
Commercial Director, Primenet
