

Enhanced Protection: Accelerated Backup and Recovery

Fast, secure and seamless recovery that keeps your business running during any disruption.

Challenge

Organisations today are responsible for protecting rapidly growing volumes of critical data while facing increasing risks from outages, cyberattacks and strict compliance requirements. IT teams must maintain high availability on limited budgets while relying on backup systems that may not integrate smoothly or recover quickly during an incident. When systems go down, every minute of delay impacts operations, finances, customer trust and long-term business resilience.

The Data Backup Replication to Immutable Recovery Environment is designed for mid-sized enterprises needing a more robust disaster recovery solution.

By providing rapid recovery capabilities and regular testing, this service ensures that critical data can be restored quickly and efficiently, minimising downtime. The solution's compatibility with leading backup software allows for easy integration into existing systems, ensuring smooth operation and management.

By the numbers

69%

of organisations experienced an attack at least once in 2025.

94%

of organisations increased their recovery budget for 2025.

89%

of organisations had their backup repositories targeted in 2025.

Results you can rely on

ThinkOn's Accelerated Backup and Recovery delivers fast, reliable and secure disaster recovery—minimising downtime, ensuring compliance, and keeping business operations running smoothly—even during disruptions!

- Recover quickly and confidently with rapid system restoration that minimises downtime and financial impact.
- Maintain smooth operations with the solution that integrates seamlessly with existing backup tools and minimises workflow disruption.
- Stay audit-ready year-round through scheduled recovery tests, runbooks and documented certification to keep your business compliant.
- Scale protection efficiently using our flexible, cost-effective recovery resources to get the protection you need without upfront infrastructure spend.
- Enable cost-efficient scaling by activating disaster recovery only on demand to eliminate the need for large upfront infrastructure investments.

Features & capabilities

Rapid disaster recovery

Accelerate system restoration after outages, cyberattacks or natural disasters to reduce downtime impact.

Dedicated recovery targets

Enable expedited failover and consistent performance during high-pressure recovery events.

Seamless backup integration

Integrates smoothly with existing Veeam, Commvault, or workloads for frictionless operations.

Flexible connectivity options

Supports multiple networking choices—including customer-provided carriers—to align with existing architectures.

Six-month restore tests

Regular validation of backup integrity.

Fully managed annual recovery test

Professional oversight and documentation. Includes runbook, post-action review, and completion certificate

Why choose ThinkOn?

- We're 100% channel-only, so we never compete with partners or sell direct—we win when you win.
- Our building block approach integrates modular tech stacks to help you scale, innovate faster and stay competitive.
- ThinkOn is not subject to any foreign data access or privacy regulations outside of Canada.
- ThinkOn is a VMware Cloud Service Provider (VCSP). We are a VMware Sovereign Cloud Provider built on the VMware platform and the first Canadian partner in the VMware Sovereign Cloud Initiative.
- Predictable, subscription-based pricing means no hidden fees or billing surprises.
- Our 24/7/365 support is always human—no bots, no menus, just real help when you need it.

"ThinkOn's high level of security and reliability, the ease of doing business with them, the monthly billing, and the unlimited data combine to create a phenomenal product."

—Tony Smith, Commercial Director, Primenet
