

Essential protection: Immutable Backup Archive

Keep critical data safe, compliant, and easily recoverable without complex management

Challenge

Organisations must protect critical data, minimise downtime, and control costs. IT teams face limited resources, ransomware and deletion risks, complex platform integrations, unpredictable storage fees, and challenges maintaining compliance and visibility. Without streamlined solutions, ensuring data immutability, recoverability, and regulatory adherence becomes a significant burden.

Our Immutable Backup Archive provides small to mid-sized businesses with a low-cost, easy-to-use solution for offsite backups.

By ensuring data immutability, it offers peace of mind that critical data is protected from ransomware and other cyber threats. This solution requires minimal IT involvement, making it ideal for companies with limited technical resources.

By the numbers

59%

of Australian businesses (over half) reported experiencing a cyberattack in 2024

74%

of Australian leaders plan to increase cybersecurity budgets in the next 12 months

35%

of Australian business leaders rank cloud security as a top cybersecurity investment focus

Results you can rely on

ThinkOn's Immutable Backup Archive delivers reliable, compliant, and always-recoverable data protection—simplifying backup management, reducing operational risk, and supporting seamless integration with your existing infrastructure.

- Achieve peace of mind knowing your data is safe and always recoverable with immutable backups, continuous xDR monitoring, and annual recovery tests.
- Free IT teams to focus on strategic priorities with simple setup and minimal ongoing backup management.
- Restore operations quickly after disruptions with reliable data availability, minimising downtime and operational risk.
- Ensure ongoing compliance effortlessly with annual testing and certification for audit readiness and peace of mind.
- Integrate seamlessly with existing infrastructure including Veeam, Zerto, Commvault, and Megaport to modernise data protection.

Features & capabilities

Reliable offsite backup

A simple, dependable offsite solution that reduces the risk of data loss.

Simple provisioning

Easy to set up and use, so data can be restored quickly without the need for deep technical expertise.

Internet and Megaport connectivity

Our flexible connectivity options let you meet offsite data storage compliance requirements effortlessly and consistently.

Object storage with immutability

Our immutable object storage provides secure and unchangeable storage for your critical data.

Annual restore test coordination

Leave the scheduling to us. We coordinate your annual restore testing, reducing disaster recovery complexity while allowing you to maintain control over critical data.

Seamless integration

Connect easily with existing platforms like Veeam, Zerto, Commvault, and Megaport to modernise data protection.

Why choose ThinkOn?

- We're 100% channel-only, so we never compete with partners or sell direct—we win when you win.
- Our building block approach integrates modular tech stacks to help you scale effectively, innovate faster, and stay competitive.
- ThinkOn is not subject to any foreign data access or privacy regulations outside of Canada.
- ThinkOn is a VMware Cloud Service Provider (VCSP) and a VMware Sovereign Cloud Provider built on the VMware platform—the first Canadian partner in the VMware Sovereign Cloud Initiative.
- Predictable, subscription-based pricing means no hidden fees or billing surprises.
- Our 24/7/365 support is always human—no bots, no menus, just real help when you need it.

"ThinkOn's high level of security and reliability, the ease of doing business with them, the monthly billing, and the unlimited data combine to create a phenomenal product."

—Tony Smith, Commercial Director, Primenet
