

Elite protection: Continuous Replication and Recovery

Keep mission-critical data secure, compliant, and recoverable with near-zero downtime.

Challenge

Organisations today are responsible for protecting rapidly growing volumes of critical data while facing increasing risks from outages, cyberattacks, and strict compliance requirements. IT teams must maintain high availability on limited budgets while relying on backup systems that may not integrate smoothly or recover quickly during an incident. When systems go down, every minute of delay impacts operations, finances, customer trust, and long-term business resilience.

ThinkOn's Continuous Replication and Recovery targets large enterprises and mission-critical applications that cannot afford significant downtime.

Regular testing and validation, coupled with dedicated recovery resources, provide the highest level of assurance that recovery plans will succeed when needed. Continuous Replication and Recovery supports complex environments, offering granular control and comprehensive compliance with industry standards.

By the numbers

59%

of Australian businesses (over half) reported experiencing a cyberattack in 2024

74%

of Australian leaders plan to increase cybersecurity budgets in the next 12 months

35%

of Australian business leaders rank cloud security as a top cybersecurity investment focus

Results you can rely on

ThinkOn's Continuous Replication and Recovery ensures mission-critical systems remain available and protected. Real-time replication and validated recovery give your team confidence in business continuity.

- Achieve peace of mind knowing critical data is protected, recoverable, and compliant with immutable backups and continuous monitoring.
- Minimise operational disruption through near-instantaneous failover and dedicated recovery resources for mission-critical applications.
- Maintain audit readiness and regulatory compliance with structured processes, runbooks, post-action reviews, and completion certificates.
- Ensure business continuity with near-zero RTO and RPO, validated through unlimited testing and proactive recovery validation.
- Integrate seamlessly with existing backup infrastructure to reduce complexity and support smooth disaster recovery workflows.
- Deploy unlimited testing with no resource challenges.

Features & capabilities

Rapid disaster recovery

Quickly recover mission-critical applications after outages, cyberattacks, or other disruptions—minimising downtime.

Dedicated failover target

Minimise data loss and recovery time through real-time replication that enables immediate failover.

Compliance and audit readiness

Maintain audit-ready backups and meet stringent industry regulations through structured processes and documentation.

Reliable recovery validation

Regular testing and post-action reviews confirm disaster recovery strategies meet compliance and operational requirements.

Seamless infrastructure integration

Support existing platforms like Veeam, Zerto, and Commvault for smooth disaster recovery deployment.

Flexible architecture

Adapt workflows to complex IT environments and leverage multiple connectivity options for uninterrupted operations.

Why choose ThinkOn?

- We're 100% channel-only, so we never compete with partners or sell direct—we win when you win.
- Our building block approach integrates modular tech stacks to help you scale effectively, innovate faster, and stay competitive.
- ThinkOn is not subject to any foreign data access or privacy regulations outside of Canada.
- ThinkOn is a VMware Cloud Service Provider (VCSP) and a VMware Sovereign Cloud Provider built on the VMware platform—the first Canadian partner in the VMware Sovereign Cloud Initiative.
- Predictable, subscription-based pricing means no hidden fees or billing surprises.
- Our 24/7/365 support is always human—no bots, no menus, just real help when you need it.

"ThinkOn's high level of security and reliability, the ease of doing business with them, the monthly billing, and the unlimited data combine to create a phenomenal product."

—Tony Smith, Commercial Director, Primenet
