

Custom data protection

for a medium-sized manufacturing leader

OVERVIEW

This medium-sized manufacturing business produces specialised components for the automotive industry. With confidential designs and sensitive customer information stored on its servers, data protection is a top priority.

CHALLENGES

Securing data against threats while meeting industry compliance standards

The company faced the challenge of ensuring their data was secure and protected from threats such as cyberattacks, natural disasters, and human error. They also needed to comply with industry regulations and standards to safeguard sensitive information.

SOLUTION

Tailored, scalable data protection with ThinkOn's secure cloud infrastructure

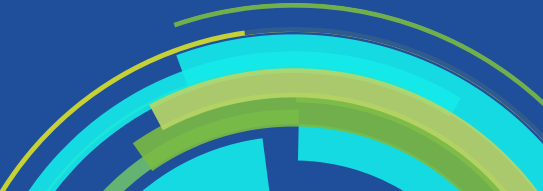

ThinkOn's Data Protect Services offered the manufacturing company a solid and secure solution tailored to their specific needs. By leveraging ThinkOn's highly secure cloud infrastructure, the company was able to store and back up its critical data offsite, reducing the risk of data loss. DPS's scalability allowed the company to align its investment with its needs, ensuring cost-effectiveness while maintaining top-tier security.

Fast data recovery and compliance assurance with ThinkOn's advanced capabilities

ThinkOn's advanced data recovery capabilities ensured that the company could recover essential data swiftly in the event of data loss, minimising operational downtime. With an RTO of 24 hours and regular recovery tests, the company had confidence in their ability to meet stringent industry regulations and protect sensitive data.

OUTCOME FEATURES

- **Object storage with immutability:** Secure, unalterable storage for safeguarding critical data against tampering or unauthorised access.
- **24-hour recovery time objective (RTO) and recovery point objective (RPO):** Ensures the company can recover their data with minimal downtime and data loss in case of a disaster.
- **Compatibility with major backup software:** Seamlessly integrates with Veeam, Commvault, Rubrik, Veritas, and Dell Networker, making it a versatile solution for their existing IT environment.

IMPLEMENTATION

- **Seamless integration:** The ThinkOn team successfully integrated the Offsite Immutable Data Archive with the company's current backup systems, ensuring continuous protection without disrupting day-to-day operations.
- **Annual recovery testing:** ThinkOn coordinated regular recovery tests to ensure that the company could validate the integrity and availability of their data in a disaster scenario.
- **User-friendly setup:** The company received comprehensive guides and support from ThinkOn, allowing their IT team to easily manage the setup and ongoing operations.

Strengthened data security and rapid recovery ensures business continuity and peace of mind

By using ThinkOn Data Protection Services, the company was able to enhance its data security and compliance efforts. In the event of a data loss or breach, they could quickly recover their critical information and minimise the impact on their operations. This added layer of protection gave them peace of mind knowing that their data was safe and secure.
